

Did you know...

Affiliate System – Lineup Dialog: Preserve sort order in schedule text files

The Operations button on the Lineup dialog offers options to export and import lineup schedules to and from a text file. Previously, these import and export operations would cause the lineups in the schedule to be sorted alphabetically, which is not always desired.

As of v10.2 software, the Operations > Import/Export schedule will now preserve the sort order of lineups (and not sort alphabetical).

	A	B	C
1	LG	UseUnrepPct	YES
2	LG	LineupVersioning	NO
3	LI	PLUTO	
4	LI	MOON	MSu6a-12m
5	LI	MARS	
6			

Affiliate System – MSL Report: New “Other Bands” summary total

As of v10.2 software, the Summary page of the MSL Report now includes a new “Other bands” summary total in addition to the summary totals for "AM Stations" and "FM Stations". This means that the sum of these three station band totals should be equal to the reported total station count, even if digital stations are used.

DMA	SATURN Unique	
	# of Mkts	# of Stns
Market Ranks		
Top 10	9	32
Top 25	17	42
Top 50	24	50
AM Stations		21
FM Stations		46
Other Bands		4
Total United States	41	71

Lineup Manager – Increased precision of stored clearance percentages

The clearance percentage stored in lineups was previously accurate with 1 decimal place (e.g. 5.2%). As of v10.2 software, now it is accurate with 3 digits of precision (e.g. 5.237%). This allows very fine tuning of results calculated based on clearance percentage.
