

## Did you know...

Affiliate System has new Lineup Input features to deal with repeat lineups:

- You can easily create a copy of the current lineup selection using the new “Copy” button. See “A” below. In this example, the “Copy” button was clicked four times, resulting in a total of 5 occurrences of the same lineup.
- Under the “Operations” button, there is a new option to “Delete Duplicate Lineups (X)”. This will delete all repeated lineup entries (i.e., those shown with a numeric suffix of .2 or higher). See “B” below.

The screenshot illustrates the 'Audience Input Selections' interface. It shows two 'Lineups' panels. The left panel shows a single lineup 'PLUTO' selected. A red arrow labeled 'A.' points from the 'Copy' button in this panel to the 'Copy' button in the right panel. The right panel shows five duplicate lineups: 'PLUTO.1' through 'PLUTO.5'. Below this, a table shows the resulting lineup data:

Lineup Code	Full Name	Override Exact Time (*)	Override Spots (#)	Cost (\$)	Use ZCode	Unrep. Pct. (%)
PLUTO.1	Pluto Lineup Ex..			0	ZCode	1.188
PLUTO.2	Pluto Lineup Ex..			0	ZCode	1.188
PLUTO.3	Pluto Lineup Ex..			0	ZCode	1.188
PLUTO.4	Pluto Lineup Ex..			0	ZCode	1.188
PLUTO.5	Pluto Lineup Ex..			0	ZCode	1.188

Below the table, the 'Operations' menu is open, and a red arrow labeled 'B.' points to the 'Delete Duplicate Lineups (4)...' option. The bottom panel shows the 'PLUTO' lineup selected again, with the duplicate entries removed.
